

**AMENDMENTS TO THE SPECIFICATION**

**In the Specification:**

Please replace the paragraph beginning at page 6, line 5 with the following amended paragraph:

The system 100 includes a set component 110 that identifies sets of data 130, and, a display component 120 that displays the sets of data 130. For example, the display component 120 can display at least one data set in a squeezed/semi-collapsed state.

Please replace the paragraph beginning at page 8, line 28 with the following amended paragraph:

The input device(s) 710 can facilitate viewing of set(s) of data 130 in a semi-collapsed state. For example, arrow and/or cursor key(s) on a keyboard allow a viewer to show previously hidden items in the group by selecting a visible item and pressing a cursor key to select the next or previous item in the group. As hidden items are selected, they are moved vertically in the group to become visible.
